PART II ICT SUPPORT OF PROJECT – ORIENTED ORGANIZATION . . . 69

Introduction 70

8. Technological and Information Requirements of Project-Oriented Organization Based on PMBOK® Guide 71
8.1. Project Data 71
8.2. Project Management Processes Knowledge Areas. 73
8.3. ICT Tools in Project Management Processes Knowledge Areas . 74
8.4. Detailed Description of Selected ICT Tools Utilization 76
8.5. Summary 89

9. Business Intelligence Systems – Technological Support of Project-oriented Organizations 90
9.1. Business Intelligence Systems in General 90

9.1.1. Definition of Business Intelligence 90
9.1.2. Business Intelligence Tools 92
9.1.3. The General Concept of Architecture of Business Intelligence Systems 93
9.1.4. Database Components of Business Intelligence Systems 96
9.2. Business Intelligence Systems in the Project Management Context 105
9.2.5. The Use of Business Intelligence Systems in the Project Lifecycle. 107
9.2.6. Business Intelligence as Project Management Decision Support 108
9.3. Summary 109

10. Project Management Software 110
10.1. The History of Project Management Software 110
10.2. Types of Project Management Software. 112
10.3. Project Management Software Procurement 114
10.3.1. Software Requirements Specification 115
10.3.2. Evaluation of Application Software Selection Criteria . 115
10.3.3. Application Software Procurement 115
10.4. The Project Management Business Intelligence Solution. 117
10.5. Summary 119

11. Research Results 121
11.1. Research Sample 121
11.2. Results of Project Management Software Usage 122
11.3. Results of Examination of Skill Level of Working with Software Applications 124
11.4. Data Mining – Cluster Analysis of Data from Communication Area 125
11.5. Summary 130

12. Conclusion 131
