The reuse policy of European Commission documents is implemented by Commission Decision 2011/833/EU of 12 December 2011 on the reuse of Commission documents (OJ L 330, 14.12.2011, p. 39). Unless otherwise noted, the reuse of this document is authorised under a Creative Commons Attribution 4.0 International (CC-BY 4.0) licence (<https://creativecommons.org/licenses/by/4.0/>). This means that reuse is allowed provided appropriate credit is given and any changes are indicated.

For any use or reproduction of elements that are not owned by the European Union, permission may need to be sought directly from the respective rightholders.

PREFACE

Transport represents a crucial sector of the economy. This publication provides an overview of the most recent and most pertinent annual transport-related statistics in Europe. It covers the European Union and its 27 Member States (EU-27) and, as far as possible, the current EU candidate countries, the EFTA countries and UK.

The content of this pocketbook is based on a range of sources including Eurostat, international organisations and associations, national statistics and, where no data were available, own estimates. Own estimates have mainly been produced to get an idea of the EU total. At the level of individual countries, they are merely indicative and should by no means be interpreted as official data.

In particular, the Commission services would like to thank the following organizations and associations for their valuable contributions and to acknowledge that they agreed to the use of their data:

- **European Automobile Manufacturers' Association (ACEA)**
- **FlightGlobal**
- **International Road Federation (IRF)**
- **International Transport Forum (ITF)**
- **International Union of Railways (UIC)**
- **United Nation Economic Commission for Europe (UNECE)**

The publication consists of three parts:

- (1) a general part with general economic and other relevant data,
- (2) a transport part covering both passenger and freight transport as well as other transport-related data, and, finally,
- (3) an energy and environmental part with data on the impact which the transport sector has on energy use and the environment.

Most of the tables have data up to 2021; where available, more recent data have been provided.

The tables of this pocketbook may also be found on the Europa site at: https://ec.europa.eu/transport/media/media-corner/publications_en

Many tables on the internet contain more data than could be presented in this pocketbook. The sources referencing is more detailed in the excel tables presented on the internet. Some tables may be updated on the web before the publication of the next paper version.

Eurostat, the main data provider, can be accessed directly on the internet at: <https://ec.europa.eu/eurostat/data/database>

EEA, the data provider for the environmental part, can be accessed directly on the internet at: <https://www.eea.europa.eu/>

Comments on this publication and suggestions for improving it are appreciated. They should be sent to move-transport-data@ec.europa.eu

CONTENTS

PART 1 – GENERAL DATA

1.1	General data	9
1.2	Growth in GDP and industrial production	10
1.3	Employment and unemployment	11
1.4	Share of gross value added and employment – By sector	12
1.5	Population	13
1.6a	Member States external trade of goods – Imports	14
1.6b	Member States external trade of goods – Exports	15
1.7	Comparison EU-27 – World	16

PART 2 – TRANSPORT

2.1	General	19
2.1.1	Statistical overview – EU transport	19
2.1.2	Transport growth – EU-27	21
2.1.3	Road transport – Speed limits, blood alcohol limits	22
2.1.4	Road transport – Maximum gross vehicle weight	23
2.1.5	Employment by mode of transport	24
2.1.6	Number of enterprises by mode of transport	25
2.1.7	Turnover by mode of transport	26
2.1.8	Final consumption of households for transport	27
2.1.9	EU-27 Evolution of consumer prices for passenger transport	28
2.1.10	EU-27 External trade by mode of transport	29
2.1.11	Environmental taxes & transport – Energy taxes as % of GDP – Transport fuel taxes	30
2.1.12	Environmental taxes & transport – Environmental taxes as % of GDP – Transport (excl. fuel)	31
2.1.13	Environmental taxes & transport – Fuel and other taxes as % of total taxation	32
2.1.14	Comparison EU-27 – World – Infrastructure and vehicles	33
2.1.15	Comparison EU-27 – World – Passenger and freight transport	34
2.2	Performance of freight transport expressed in tonne-kilometres	35
2.2.1	EU-27 Performance for freight transport – By mode	35
2.2.2	EU-27 Performance – By mode	36
2.2.3	Modal split of freight transport on land – By country	37
2.2.4a	Road – National haulage	38
2.2.4b	Road – International haulage	39
2.2.4c	Road – National and international haulage	40
2.2.4d	Road – Transport performance adjusted for territoriality	41
2.2.5	Railways	42
2.2.6	Inland waterways	43
2.2.7	Oil pipelines	44
2.2.8	United States	45
2.3	Performance of passenger transport expressed in passenger-kilometres	47
2.3.1	EU-27 Performance for passenger transport – By mode	47
2.3.2	EU-27 Performance – By mode	48
2.3.3	Modal split of passenger transport on land – By country	49

CONTENTS

2.3.4	Passenger cars	50
2.3.5	Buses & coaches	51
2.3.6	Tram & metro	52
2.3.7	Railways	53
2.3.8	Rail	54
2.3.9	United States	55
2.4	Performance of freight and passenger transport using other indicators	56
2.4.1	Air – Passenger traffic between Member States	56
2.4.2	Air – Major European airlines	58
2.4.3	Air – Passenger traffic at major EU airports	59
2.4.4a	Air – Main intra-EU airport pairs in passenger transport	60
2.4.4b	Air – Main connections between EU and non-EU airports in passenger transport	61
2.4.5	Air – Freight traffic at major EU airports	62
2.4.6	Air – Aircraft traffic at major EU airports	63
2.4.7	Sea – Inward and outward flow of passengers – By country	64
2.4.8	Sea – Passenger traffic at major EU seaports	66
2.4.9	Sea – Freight traffic at major EU seaports	67
2.4.10a	Sea – Intra-EU maritime transport – By country	68
2.4.10b	Sea – Main routes in intra-EU maritime transport	69
2.4.11	Sea – Container traffic at major EU seaports	70
2.4.12	Combined transport traffic	71
2.4.13	Road – Alps crossing freight traffic	72
2.4.14	Road – Pyrenees crossing traffic	73
2.4.15	Rail – Traffic measured in train-kilometres	74
2.4.16a	Rail – Degree of market opening – passengers	75
2.4.16b	Rail – Degree of market opening – freight	76
2.4.17	Rail – Alps crossing freight traffic	77
2.5	Infrastructure	78
2.5.1	Road – Length of motorways	78
2.5.2	Road – Length of road network	79
2.5.3	Railways – Length of lines in use	80
2.5.4	Railways – High-speed rail network	81
2.5.5	Railways – Main railway gauge and electric current used	82
2.5.6	Air – Number of airports	83
2.5.7	Maritime – Number of Ports	84
2.5.8	Inland waterways – Length in use	85
2.5.9	Pipelines	86
2.6	Means of Transport	87
2.6.1	Road – Motorisation	87
2.6.2	Road – Passenger cars – Stock of registered vehicles	88
2.6.3	Road – Buses and coaches – Stock of registered vehicles	89
2.6.4	Road – Goods vehicles – Stock of registered vehicles	90
2.6.5	Road – Powered two-wheelers – Stock of registered vehicles	91
2.6.6	Road – Passenger cars – New vehicle registrations	92
2.6.7	Road – Goods vehicles – New vehicle registrations	93

CONTENTS

2.6.8	Road – Buses and coaches – New vehicle registrations	94
2.6.9	Road – Motorcycles – New vehicle registrations	95
2.6.10	Road – Mopeds – New vehicle deliveries	96
2.6.11	Sea – EU merchant fleet	97
2.6.12a	Sea – World merchant fleet – By world region	98
2.6.12b	Sea – World merchant fleet – By type of ship	99
2.6.13	Air – Passenger aircraft	100
2.6.14	Air – Freight, special, business aircraft	101
2.6.15	Rail – Locomotives and railcars	102
2.6.16	Rail – Passenger transport vehicles	103
2.6.17	Rail – Goods transport wagons	104
2.7	Safety	105
2.7.1	Road fatalities	105
2.7.2	Road fatalities country rankings	106
2.7.3a	Road fatalities – By type of user	107
2.7.3b	Road fatalities of vehicle occupants – By type of vehicle	108
2.7.4	Road accidents	109
2.7.5	Railway fatalities	110
2.7.6	Air – Lives lost	111
2.7.7	Sea – Ships lost (World) – By type	112

PART 3 – ENERGY AND ENVIRONMENT

3.1	Energy	115
3.1.1	Glossary	115
3.1.2	Average calorific values – Energy content	117
3.1.3	Conversion factors	118
3.1.4	Energy statistics for EU-27	119
3.1.5	Final energy consumption – By sector	120
3.1.6	Final consumption of motor gasoline, diesel, biofuels & biogas for transport – By fuel	122
3.1.7	Biofuels production – By fuel	123
3.2	Environment	124
3.2.1	Total Greenhouse Gas (GHG) emissions	124
3.2.2	GHG emissions from Transport	125
3.2.3	GHG emissions – EU-27 – By sector	126
3.2.4	GHG emissions – 2021 – By sector	130
3.2.5	GHG emissions from transport – EU-27 – By mode	134
3.2.6	GHG emissions from transport – 2021 – By mode	136
3.2.7	GHG emissions from road transport – EU-27 – By transport mean	138
3.2.8	Total CO ₂ emissions	140
3.2.9	CO ₂ emissions from transport	141
3.2.10	CO ₂ emissions – EU-27 – By sector	142
3.2.11	CO ₂ emissions – 2021 – By sector	146
3.2.12	CO ₂ emissions from transport – EU-27 – By mode	150
3.2.13	CO ₂ emissions from transport – 2021 – By mode	152
3.2.14	CO ₂ emissions from road transport – EU-27 – By transport mean	154
3.2.15	Oil spills at sea	156

SYMBOLS AND ABBREVIATIONS

12	<i>estimates are printed in italic</i>
%	per cent
-	not applicable, does not exist
blank	data not available
0	zero or figure less than half of unit used
EUR	euro
DG	Directorate-General of the European Commission
dwt	deadweight tonnage (shipping)
GDP	gross domestic product
gt	gross tonnage (shipping)
mio	1 million
mtow	maximum take-off weight (aircraft)
pkm	passenger-kilometre: a unit of measure: 1 passenger transported a distance of 1 kilometre
PPS	purchasing power standards
TEU	twenty-foot equivalent unit
tkm	tonne-kilometre: a unit of measure: 1 tonne transported a distance of 1 kilometre
	break in horizontal time series
—	break in vertical time series

COUNTRY ABBREVIATIONS

EUROPEAN UNION COUNTRIES (EU-27) (ALSO EEA MEMBERS)

		EU MEMBER STATE SINCE:
BE	Belgium	1958
BG	Bulgaria	2007
CZ	Czech Republic	2004
DK	Denmark	1973
DE	Germany	1958
EE	Estonia	2004
IE	Ireland	1973
EL	Greece	1981
ES	Spain	1986
FR	France	1958
HR	Croatia	2013
IT	Italy	1958
CY	Cyprus	2004
LV	Latvia	2004
LT	Lithuania	2004
LU	Luxembourg	1958
HU	Hungary	2004
MT	Malta	2004
NL	Netherlands	1958
AT	Austria	1995
PL	Poland	2004
PT	Portugal	1986
RO	Romania	2007
SI	Slovenia	2004
SK	Slovak Republic	2004
FI	Finland	1995
SE	Sweden	1995

OTHER EUROPEAN ECONOMIC AREA (EEA) AND IN EUROPEAN FREE TRADE ASSOCIATION (EFTA)

IS	Iceland	EEA: 1994	EFTA: 1960
LI	Liechtenstein	EEA: 1994	EFTA: 1991
NO	Norway	EEA: 1994	EFTA: 1960

OTHER EUROPEAN FREE TRADE ASSOCIATION (EFTA)

CH	Switzerland	EFTA: 1960
----	-------------	------------

EUROPEAN UNION CANDIDATE COUNTRIES

BA	Bosnia and Herzegovina
ME	Montenegro
MD	Moldova
MK	North Macedonia
AL	Albania
RS	Serbia
TR	Turkey
UA	Ukraine

OTHER COUNTRIES

CN	China
CS	Czechoslovakia (until 1992)
JP	Japan
RU	Russia
UK	United Kingdom (EU Member 01.01.1973-31.01.2020)
US	United States

NB: The countries which were members of the EU in 1994 became members of the EEA in 1994, those which joined the EU in 1995 had already been EEA members since 1994 and those which joined the EU in 2004 and 2007 became members of the EEA upon accession to the EU. Croatia joined EEA in 2014.
The former GDR is always included in **DE**; unification on 3.10.1990.

Statistical overview – EU transport 2.1.1

Gross Value Added:

With around EUR 636 billion in Gross Value Added (GVA) at current prices, the transport and storage services sector (including postal and courier activities) accounted for about 5 % of total GVA in the EU-27 in 2021 ⁽¹⁾. It should be noted, however, that this figure only includes the GVA of companies whose main activity is the provision of transport (and transport-related) services and that own account transport operations are not included.

Employment:

In 2021, the transport and storage services sector (including postal and courier activities) in the EU-27 employed around 10 million persons ⁽²⁾, some 5.3 % of the total workforce ⁽³⁾. Around 53 % of them worked in land transport (road, rail and pipelines), 3 % in water transport (sea and inland waterways), 3 % in air transport and 27 % in warehousing and supporting activities (such as cargo handling, storage and warehousing) and the remaining 15 % in postal and courier activities. 22 % of the employed persons in the transport sector were women.

Household expenditure:

In 2021, private households in the EU-27 spent EUR 880 billion or roughly 12.1 % of their total consumption on transport-related items. Around 29 % of this sum (around EUR 258 billion) was used to purchase vehicles, 58 % (EUR 509 billion) was spent on the operation of personal transport equipment (e.g. to buy fuel for the car) and the rest (EUR 112 billion) was spent for transport services (e.g. bus, train, plane tickets).

Goods transport:

In 2021, the total goods transport activities in the EU-27 are estimated to amount to 3432 billion tkm. This figure includes intra-EU air and sea transport but not transport activities between the EU and the rest of the world. Road transport accounted for 54.3 % of this total, rail for 11.9 %, inland waterways for 4 % and oil pipelines for 2.6 %. Intra-EU maritime transport was the second most important mode with a share of 27.2 % while intra-EU air transport only accounted for 0.1 % of the total.

Passenger transport:

In 2021, total passenger transport activities in the EU-27 by any motorized means of transport are estimated to amount to 4779 billion pkm or on average around 10700 km per person. This figure includes intra-EU air and sea transport but not transport activities between the EU and the rest of the world. Passenger cars accounted for 78.3 % of this total, powered two-wheelers for 2.2 %, buses & coaches for 6.8 %, railways for 5.6 % and tram and metro for 1.2 %. Intra-EU air and intra-EU maritime transport contributed for 5.7 % and 0.3 % respectively.

- NB:** ⁽¹⁾ The transport share amounts of 4.6 % of total GVA if postal and courier activities are not included. Estimations based on Eurostat National Account (2019 data).
⁽²⁾ Figures on number of persons employed in transport, total workforce and shares per mode based on Eurostat Labour Force Survey (age 15-64 years).
⁽³⁾ 4.5 % of total employment if postal and courier activities are not included.

2.1.1 Statistical overview – EU transport

Safety:

Road: 19917 persons were killed in road accidents (fatalities within 30 days) in 2021, 5.7% more than in 2020 (when 18836 people lost their lives). In comparison with 2001, the number of road fatalities was lower by about two thirds (-61.2%).

Rail: 5 passengers lost their lives in 2021; this figure does not include casualties among railway employees or other people run over by trains.

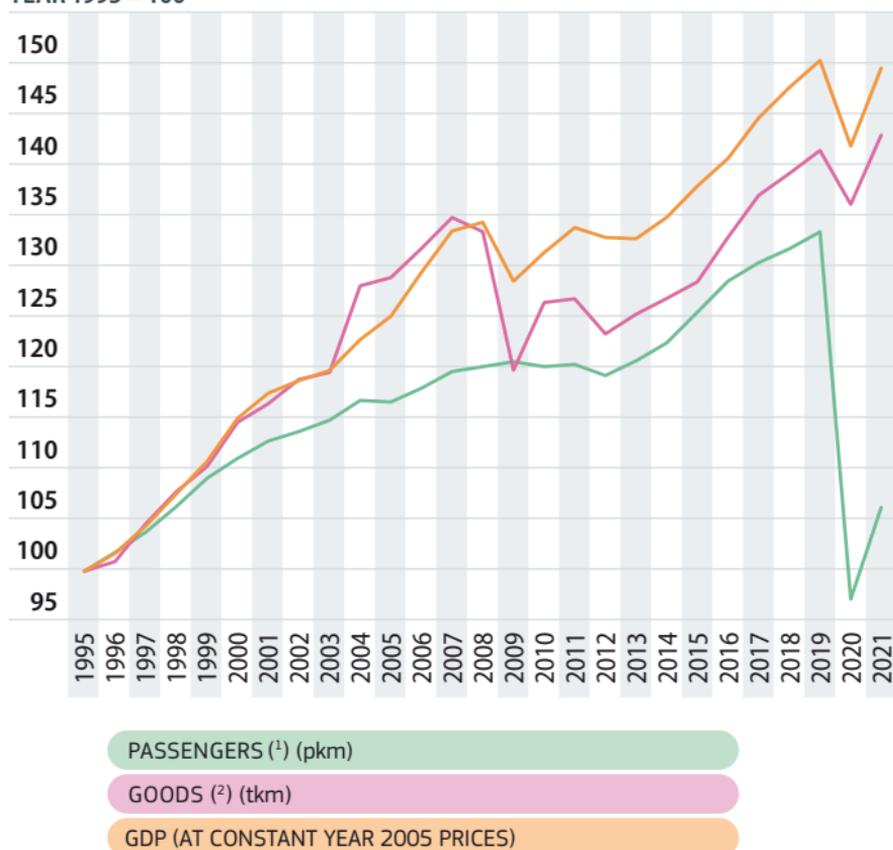

Air: 18 lives were lost in 2022: 8 fatalities occurred on EU territory and involved a non-EU operator, and 10 fatalities involved an EU registered aircraft (2 business flights).

Transport growth – EU-27

2.1.2

NB: Situation as of 1 June 2022, the date of accessing the source: Going abroad - European Commission (europa.eu)

IE, CY and MT drive on the left hand side of the road, the other Member States drive on the right hand side (Sweden since 3 September 1967).

The reported speed limits refer to general circumstances. Different speed limits might apply in residential or pedestrian areas, on the basis of weather conditions, the time of the day, the vehicle driven, the season, the visibility or unless otherwise stated by traffic signs. The higher figure shown in the "outside built-up areas" column generally refers to the speed limit on dual carriageways that are not motorways.

Speed limits: BE: 70km/h outside built-up areas in the Flemish Region.

DE: Motorways: No general speed limit, recommended speed limit is 130km/h (more than half the network has a speed limit of 120km/h or less).

ES: different speed limits apply on non-urban roads according to the presence of hard shoulders, or if the vehicle is equipped with a trailer or dangerous goods.

Blood alcohol limits: In many countries, special (more restrictive) rules apply to novice (i.e. new, unexperienced) and professional drivers.

NB: An articulated vehicle consists of a road tractor coupled to a semi-trailer. A road train is a goods road motor vehicle coupled to one or more trailers.

The permissible maximum weight varies according to different conditions: distance between the axles, number of driven axles, type of suspension, single or double mounted tyres, the vehicle is performing national or international traffic, performing combined transport operations, type of road, type of fuel or type of goods. For a more complete country overview please consult the International Transport Forum website.

⁽¹⁾ Differences between regions. For a complete overview please consult the International Transport Forum website.

⁽²⁾ Only for air suspension or similar, twin tyres or ABS (Anti-lock Braking System).

⁽³⁾ Under specific conditions EMS (European Modular System) combinations may have a maximum length of 25.25m and maximum mass of 60t.

⁽⁴⁾ Increased values are applicable for certain type of transport.

⁽⁵⁾ For vehicles registered in an EEA member country.

⁽⁶⁾ Five-axle: 44 t; six-axle: 56 t; seven-axle: 60 t; eight-axle: 64-68 t (restrictions for ADR), 69-76 t (not for ADR).

⁽⁷⁾ 74 t on some roads.

NB: Air and Sea: only domestic and intra-EU-27 transport; estimates for air and for sea based on Eurostat data. The time series for maritime activity from 1995 to 2004 and for aviation activity from 1995 to 2007 have been recalibrated by DG MOVE in line with the new EU-27 figures to avoid break in series. Following methodological changes, the times series (2005–2020) for maritime activity were backwards revised. Road: national and international haulage by vehicles registered in the EU-27 until 2004, from 2005 onwards the activity performed by European drivers within the EU territory.

2021	78.3	2.2	6.8	5.6	1.2	5.7	0.3

NB: Air and Sea: only domestic and intra-EU-27 transport; estimates for air and for sea based on Eurostat data. The time series for maritime activity from 1995 to 2004 and for aviation activity from 1995 to 2007 have been recalibrated by DG MOVE in line with the new EU-27 figures to avoid break in series. Following change in the methodology the time series 2008-2020 for maritime and air activity have been revised.
P2W: Powered two-wheelers.

NB: Data is not harmonised and therefore not fully comparable. 2021 data may be provisional. Data sometimes includes activity of foreign vehicles performed within the country, therefore EU aggregates might be affected by double-counting. Generally vans are not considered in this table, but there may be exceptions.

FR: passenger-km include transport activity on the territory of vehicles not registered in France. Includes foreign vans.

UK: data refer to Great Britain only; include pkm by vans; data revision since 2000.

DE: includes DE-E: 1990=90.3. In 2021 revision of 2017 and 2018 data.

2021 provisional figures;

CH: includes activity of foreign vehicles in the country.

TR: excludes urban traffic.

DK: figures exclude activity of vans with a mass higher than 2000 kg.

MD: includes activity of taxis only.

NB: Data is not harmonised and therefore not fully comparable. 2021 data may be provisional. Data sometimes includes activity of foreign vehicles performed within the country, therefore EU aggregates might be affected by double-counting.
CZ: 1990: 43.4

FR: includes tram transport activity at province level, and tram transport in the Île de France until 2000. It also includes occasional bus transport in the territory of France performed by foreign buses.
AT: the time series includes an estimate for trolleybuses.

UK: GB data + 1.5 bln pkm throughout to account for Northern Ireland.

CH: includes activity of foreign vehicles in the country.

PL: includes long-distance transport and estimated data for urban transport.

NL: the time series from 2010 estimates the share of bus transport over the aggregate 'bus/tram/metro' published in the OVIN Travel Survey. Previous years' estimates have been retrofitted until 2010.

NO: includes scheduled bus transport.

RO: includes interurban and international road transport, local public transport by buses and minibuses, and trolleybuses (since 2015). Data for 2019 for buses and minibuses and trolleybuses are provisional and don't include pensioners residents in Bucarest.

NB: Data are not harmonised and therefore not fully comparable across countries.

Data for 2021 are mostly provisional.

BE: Data used for the estimations were revised as of 2018 due to change in the methodology.

FR: include metro and tramways in Île-de-France (as of 2000) and metro in other French cities.

PT: data refer to Lisbon, Porto and Sul do Tejo Metro systems (the latter as from 2014).

ES: including metro of Malaga since 2014.

AT: it includes regional rail transport activity.

NL: the time series from 2010 estimates the share of tram & metro over the aggregate 'bus/tram/metro' published in the OViN Travel Survey. Previous years' estimates have been retrofitted until 2010.

RO: new methodology as of 2015.

NB: (*) Public Service Obligation (PSO) means a requirement defined or determined by a competent authority in order to ensure public passenger transport services in the general interest that an operator, if it were considering its own commercial interests, would not assume or would not assume to the same extent or under the same conditions without reward.

FR: includes RER trains exploited by RATP and Tramline 4.

NB: Significant underreporting of Paris airports. Data from airport websites (*in italics*) often include air cargo which in reality is transported by lorry. The figures from airport websites are therefore not always fully comparable with those collected by Eurostat. The extraordinary growth rate for the Leipzig airport in 2008 is mainly due to DHL moving its hub there during 2008.

RO(**)	25.2	1.9	7.7%	27.2	7.3	26.9%
SI	14.5	2.9	19.8%	5.5	1.3	24.1%
FI	46.6	32.1	68.9%	53.7	40.9	76.0%
SE	90.8	61.1	67.3%	79.8	61.9	77.6%

NB: Data from main ports only (ports handling more than 1 million tonnes per year).

(*) The total goods transported data may be less than the sum of inward and outward traffic due to the double counting of tonnes moved within the same country.

(**) The share of intra-EU in total maritime transport may be underestimated in this table for CY and RO because a significant share of partner ports are 'unknown' and hence cannot be attributed to any geographical area.

NB (*) Public Service Obligation (PSO) means a requirement defined or determined by a competent authority in order to ensure public passenger transport services in the general interest that an operator, if it were considering its own commercial interests, would not assume or would not assume to the same extent or under the same conditions without reward.

Total market share of all but the principal railway undertakings (as a percentage of passenger-km, in some cases as a percentage of train-km).

DK: not considering metro services after break in series.

NB: Stock at end of year, except for CH: 30 September, LI: 1 July.

As a rule, data include heavy and light goods vehicles, lorries and road tractors; due to varying concepts of such vehicles, data are not fully comparable between countries.

HR: from 2009 light vans are included in passenger cars and no longer in Goods Vehicles.

EE, FR: include special purpose vehicles.

Road POWERED TWO-WHEELERS

NB: Stock at end of year, except for BE:1 August, CH:30 September, LI:1 July.
National vehicle stock data do not always include all powered two-wheelers and are therefore not fully comparable between countries.
Tricycles and quads are sometimes included in the data.
SE data includes cross-country scooters.
CH: mopeds include fast e-bikes.
Break in time series due to inclusion of mopeds from 2001 in ES, from 2002 in SI and HR, from 2004 in LV, from 2005 in PL, from 2007 in LT, from 2009 in SK, from 2011 in EE, from 2017 in BE.
CZ: Revision in 2022 of the whole time series due to inclusion of the mopeds.

NB: Persons killed are all persons deceased within 30 days of the crash. Corrective factors have been applied to the figures which did not follow this definition. As of 2015 TR includes people deceased within 30 days after the crash (break in series). As of 2018 PT includes data for Azores and Madeira. For the NL, the number of fatalities registered by the police is under-reported and equates to around 85-90% of the total number of fatalities published nationally (total in 2021 was 582).

NB: Fatalities: all fatalities on the road: car drivers and passengers, bus and coach occupants, powered two-wheelers' riders and passengers, cyclists, pedestrians, commercial vehicle drivers, etc. indicated in table 2.7.1.
Pkm: indicator of traffic volume (in the absence of consistent vehicle-kilometre data); passenger-kilometres of cars indicated in table 2.3.4 plus (mostly estimated) passenger-kilometres of motorised two-wheelers.
Inhabitants: the average population in 2021, Eurostat [demo_gind]
Passenger cars: the average stock of vehicles indicated in table 2.6.2 for 2020 and 2021.

PART 3

ENERGY AND ENVIRONMENT

PART 3
SUMMARY

3.1	ENERGY	115
3.2	ENVIRONMENT	124

Glossary

3.1.1

Conventional thermal power:

Technology for the production of electricity by combustion. May or may not include biomass use, which is also considered a renewable source of electricity.

Energy dependency:

Energy dependency shows the extent to which a country relies upon imports in order to meet its energy needs. It is calculated using the following formula: net imports / gross available energy.

Energy intensity:

Energy intensity gives an indication of the effectiveness with which energy is being used to produce added value. It is defined as the ratio of gross inland consumption of energy to gross domestic product.

Final energy consumption (FEC):

Final energy consumption is the energy finally consumed in the transport, industrial, commercial, agricultural, public and household sectors. It excludes deliveries to the energy transformation sector and to the energy industries themselves, along with energy consumption in international maritime and air transport.

Gross calorific value (GCV):

The gross calorific value is the total amount of heat released by a unit quantity of fuel, when it is burned completely with oxygen, and when the products of combustion are returned to ambient temperature.

This quantity includes the heat of condensation of any water vapour contained in the fuel and of the water vapour formed by the combustion of any hydrogen contained in the fuel.

Gross inland consumption (GIC):

Gross inland consumption is the quantity of energy consumed within the borders of a country. It is calculated using the following formula:

primary production + recovered products + imports + stock changes – exports – international maritime bunkers.

Net calorific value (NCV):

The net calorific value is the amount of heat released by a unit quantity of fuel when it is burned completely with oxygen, and when the products of combustion are returned to ambient temperature.

This quantity does not include the heat of condensation of any water vapour contained in the fuel or of the water vapour formed by the combustion of any hydrogen contained in the fuel.

Primary energy production:

Primary energy production is the extraction of energy from a natural source. The precise definition depends on the fuel involved, as described below.

Solid fuels: hard coal, lignite

Quantities of fuels extracted or produced, calculated after any operation for removal of inert matter. In general, production includes the quantities consumed by the producer during the production process (e.g. for heating or operation of equipment and auxiliaries), along with any quantities supplied to other on-site producers of energy for transformation or other uses.

3.1.1

Glossary

Crude oil:

Quantities of fuels extracted or produced within national boundaries, including off-shore production. Production includes only marketable production, and excludes any quantities returned to formation. Production includes all crude oil, natural gas liquids (NGL), condensates and oil from shale and tar sands, etc.

Natural gas:

Quantities of dry gas, measured after purification and extraction of natural gas liquids and sulphur. The production includes only marketable production, and excludes any quantities reinjected, vented and flared, and any extraction losses. The production includes all quantities used within the natural gas industry, in gas extraction, pipeline systems and processing plants.

Nuclear heat:

Quantities of heat produced in a reactor. Production is the actual heat produced or the heat calculated on the basis of the gross electricity generated and the thermal efficiency of the nuclear plant.

Hydropower, wind energy, solar photovoltaic energy:

Quantities of electricity generated. Production is calculated on the basis of the gross electricity generated and a conversion factor of 3600 kJ/kWh.

Geothermal energy:

Quantities of heat extracted from geothermal fluids. Production is calculated on the basis of the difference between the enthalpy of the fluid produced in the production borehole and that of the fluid disposed of via the reinjection borehole.

Biomass / wastes:

In the case of municipal solid wastes (MSW), wood, wood wastes and other solid wastes, production is the heat produced after combustion and corresponds to the heat content (NCV) of the fuel. In the case of anaerobic digestion of wet wastes, production is the heat content (NCV) of the biogases produced. The production includes all quantities of gas consumed in the installation for the fermentation processes, and excludes all quantities of flared gases. In the case of biofuels, the production is the heat content (NCV) of the fuel.

Pumped storage:

Method for storing electrical energy at hydroelectric installations by pumping water between reservoirs at different altitudes.

Renewable energy sources (RES):

Renewable energy includes hydroelectricity, biomass, wind, solar, tidal and geothermal energy.

Tonne of oil equivalent (toe):

Tonne of oil equivalent is a conventional standardised unit for measuring energy, defined on the basis of a tonne of oil with a net calorific value of 41 868 kilojoules/kg.

1 ktoe = 1 000 toe

1 Mtoe = 1 000 000 toe

Average calorific values – Energy content

NB: Emissions data are downloaded from European Environment Agency (EEA), which is the main provider for EU-wide GHE emissions data. The EEA prepares and maintains the complete EU GHG emissions inventory, which is based on data reported by Member States through the EU GHG monitoring mechanism and the UNFCCC process.

GHGs: carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), sulphur hexafluoride (SF₆), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs).

(*) Excluding international maritime and LULUCF (land use, land-use change and forestry) emissions, including international aviation and indirect CO₂.

NB: (*) Excluding LULUCF (land use, land-use change and forestry) emissions and international maritime, including international aviation and indirect CO₂.
 (**) Excluding international maritime (international traffic departing from the EU), including international aviation.

Indirect emissions from electricity use are not included in the GHG emissions from fuel combustion by manufacturing and construction, transport and other sectors (commercial/institutional, residential and agriculture/forestry/fisheries).

NB: (*) Excluding international maritime and LULUCF (land use, land-use change and forestry) emissions, including international aviation and indirect CO₂. Emissions data are downloaded from the European Environment Agency (EEA), which is the main provider for EU-wide GHG emissions data. EEA prepares and maintains the complete EU GHG emissions inventory, which is based on data reported by Member States through the EU GHG monitoring mechanism and the UNFCCC process.

CO₂ emissions from transport 3.2.9

2000		21	4	14 000
1990-1999	average	28.1	7.7	113 400
1980-1989	per	36.0	9.4	117 500
1970-1979	year	54.3	24.5	319 500

SELECTED MAJOR OIL SPILLS – World outside Europe

SHIP NAME	Year	Location	Oil lost (t)
Atlantic Empress	1979	Off Tobago, West Indies	287 000
ABT Summer	1991	900 miles off Angola	260 000
Castillo de Bellver	1983	Off Saldanha Bay, South Africa	252 000
Odyssey	1988	700 miles off Nova Scotia, Canada	132 000
Sea Star	1972	Gulf of Oman	115 000
Sanchi	2018	Off Shanghai	113 000
Hawaiian Patriot	1977	300 miles off Honolulu	95 000
Khark 5	1989	Off Atlantic Coast of Morocco	70 000
Nova	1985	Off Kharg Island, Gulf of Iran	70 000
Katina P	1992	Off Maputo, Mozambique	67 000
Exxon Valdez	1989	Prince William Sound, Alaska	37 000
Hebei Spirit	2007	Taeon, Republic of Korea	11 000

SELECTED MAJOR OIL SPILLS – Europe

SHIP NAME	Year	Location	Oil lost (t)
Amoco Cadiz	1978	Off Brittany, France	223 000
Haven	1991	Genoa, Italy	144 000
Torrey Canyon	1967	Scilly Isles, United Kingdom	119 000
Irenes Serenade	1980	Navarino Bay, Greece	100 000
Urquiola	1976	La Coruna, Spain	100 000
Independenta	1979	Bosphorus, Turkey	95 000
Jakob Maersk	1975	Oporto, Portugal	88 000
Braer	1993	Shetland Islands, United Kingdom	85 000
Aegean Sea	1992	La Coruna, Spain	74 000
Sea Empress	1996	Milford Haven, United Kingdom	72 000
Prestige	2002	Cape Finistere, Spain	63 000
Erika	1999	Brittany, France	20 000

NOTES

Getting in touch with the EU

IN PERSON

All over the European Union there are hundreds of Europe Direct centres. You can find the address of the centre nearest you online: european-union.europa.eu/contact-eu/meet-us_en

ON THE PHONE OR IN WRITING

Europe Direct is a service that answers your questions about the European Union. You can contact this service:

- by freephone: 00 800 6 7 8 9 10 11 (certain operators may charge for these calls),
- at the following standard number: +32 22999696,
- via the following form: european-union.europa.eu/contact-eu/write-us_en.

Finding information about the EU

ONLINE

Information about the European Union in all the official languages of the EU is available on the Europa website (european-union.europa.eu).

EU PUBLICATIONS

You can view or order EU publications at op.europa.eu/en/publications. Multiple copies of free publications can be obtained by contacting Europe Direct or your local documentation centre (european-union.europa.eu/contact-eu/meet-us_en).

EU LAW AND RELATED DOCUMENTS

For access to legal information from the EU, including all EU law since 1951 in all the official language versions, go to EUR-Lex (eur-lex.europa.eu).

EU OPEN DATA

The portal data.europa.eu provides access to open datasets from the EU institutions, bodies and agencies. These can be downloaded and reused for free, for both commercial and non-commercial purposes. The portal also provides access to a wealth of datasets from European countries.
