

Table of contents

Preface	xiii
Committees	xv
<i>Part A: Computer simulation and modeling, Mechanics and dynamics, and Reliability and durability of structures</i>	
Drift design approach for steel tall buildings according to Eurocode 3 <i>C. Amaddeo, K. Taskin & T. Orhan</i>	3
Weldability estimation of steels for hot work by the CCT diagrams <i>D. Arsić, V. Lazić, R.R. Nikolić & B. Hadzima</i>	9
Resistance of flat slabs by different applications of concentrated load <i>T. Augustín & L. Fillo</i>	15
Parameters of various timber-concrete composite connection systems <i>V. Bajzecerová & J. Kanócz</i>	21
Plastic resistance of IPE-section to interaction of bending internal forces $M_{y,Ed}$, $V_{z,Ed}$ and torsion internal forces B_{Ed} , $T_{\omega,Ed}$ and $T_{t,Ed}$ <i>I.J. Baláž, Mi. Kováč, T.J. Živner & Y.P. Koleková</i>	27
Plastic resistance of H-section to interaction of bending moment $M_{y,Ed}$ and bimoment B_{Ed} <i>I.J. Baláž, Mi. Kováč, T.J. Živner & Y.P. Koleková</i>	33
Experimental investigations of glass plates <i>L. Balcierák, J. Brodniansky Sr., T. Klas, V. Duchoň, J. Brodniansky & O. Katona</i>	39
The reliability of slender concrete columns subjected to a loss of stability <i>V. Benko, T. Gúcky & A. Valašík</i>	45
The cracking of prestressed girders influenced by decreased bond of tendons <i>V. Borzovič, K. Gajdošová, M. Pecník & J. Laco</i>	51
EUGLI imperfection method for columns with varying cross-sectional parameters – numerical solution <i>J. Brodniansky, L. Balcierák, V. Duchoň & O. Katona</i>	57
Analysis of passive and active Levy cable dome <i>P. Caumer & V. Urban</i>	63
Application of system identification on a steel footbridge across the Little Danube River <i>M. Fábry, R. Ároch & I. Lipták</i>	69

Non-linear analysis of concrete slender columns <i>E. Fillo, V. Knapcová & M. Čuhák</i>	75
Numerical solution for rotational stiffness of RHS tubular joints <i>M. Garifullin, N. Vatin, T. Jokinen & M. Heinisuo</i>	81
Overall imperfection method for beam-columns <i>G. Hajdú & F. Papp</i>	87
Punching resistance of column basis <i>J. Halvonik, J. Hanzel & L. Majtánová</i>	93
Identifying the causes of failure using Bayesian networks <i>M. Holický</i>	99
Risk-based target reliability <i>M. Holický</i>	105
Experimental analysis of a composite steel-concrete slab <i>A. Hrušovská & Š. Gramblička</i>	111
Reduction of computational operations in the DOProC method <i>P. Janas, M. Krejsa & V. Krejsa</i>	117
Optimum design of a cellular shell structure of a belt-conveyor bridge <i>K. Jármai & J. Farkas</i>	123
Analysis of stress inside the sandwich composite structure <i>D. Jiroutová</i>	129
Resistance of timber structures exposed to fire <i>Z. Kamenická & M. Botlů</i>	135
Local buckling of rectangular steel tubes filled with concrete <i>R. Kanishchev & V. Kvočák</i>	141
Experimental study of a four-point bending test on CLT deep beams <i>O. Katona, T. Klas, V. Duchoň, J. Brodniansky, L. Balcierák & J. Sandanus</i>	147
Aerodynamic analysis and improvements of a solar car <i>V. Kiricci, A.O. Celik, C. Insel & E. Guner</i>	153
Evaluation of fibre-reinforced polymer perfobond rib shear connector resistance tests <i>L. Kolpaský & P. Ryjáček</i>	159
In plane buckling of frames with laced built-up members <i>Mi. Kováč, Zs. Vaník & M. Magura</i>	165
Contact model of the fibre-matrix debonding coupling the interface damage and friction <i>J. Kšíňan & R. Vodička</i>	171
Strain of elements reinforced by GFRP at elevated temperatures <i>Š. Kušnír & S. Priganc</i>	177
Design and realization of composite timber-concrete beams <i>V. Kvočák & M. Al Ali</i>	183
An investigation of glued connections with acrylate adhesives <i>K. Machalická, M. Vokáč & M. Eliášová</i>	187
The maximum punching shear resistance of flat slabs <i>L. Majtánová, J. Hanzel & J. Halvonik</i>	193

Verification of experiment of vacuum loading on slab <i>J. Melcher, M. Karmazinova, J. Krsik & J. Krivakova</i>	201
Constitutive equations for selected rheological models in linear viscoelasticity <i>M. Minárová & J. Sumec</i>	207
Simulation modeling in pipeline safety assessment <i>L. V. Muravyeva</i>	213
Analysis of secondary effects due to prestressing at continuous concrete beams at ultimate limit state <i>P. Pazma, J. Halvonik & V. Borzovič</i>	219
Adaptive tensegrity module: Description of an adaptation process <i>P. Platko & S. Kmet'</i>	225
Dynamic identification of composite beam pedestrian bridges <i>G. Poprawa, M. Salamak & P. Klikowicz</i>	231
Evaluation's methods of the seismic stability of buildings and structures in the Gaza Strip <i>D. Rashid, E.S. Kolosov, N.B. Kolosova & T.N. Soldatenko</i>	237
Verification of reinforced concrete slab model using MSC Patran/Marc <i>V.A. Smirnov</i>	243
Searching for optimally corrected shape of a chosen tensegrity system <i>M. Spisak & S. Kmet'</i>	249
Composite timber-concrete floor of a family house <i>L. Surovec & M. Slivanský</i>	255
Experimental investigation of the effects of tensile force on the characteristics of turbulence downstream of a novel active grid <i>N. Szaszák, P. Benes & Sz. Szabó</i>	261
Crack initiation in concrete specimens based on alkali-activated binders <i>H. Šimonová, L. Topolář, I. Havlíková, I. Rozsypalová, B. Kucharczyková, Z. Keršner & V. Bílek Jr.</i>	267
A finite element algorithm of cables on pulleys <i>H. Štekbauer & I. Němec</i>	273
Modeling of the airflow in the small-scale model of ventilated air channel <i>L. Tazky & A. Sedlakova</i>	279
Reduction of ceiling vibrations by stiffness modification of a load-bearing structure <i>M. Tomko, R. Soltys & I. Demjan</i>	285
The acoustic non-destructive methods and their application to stress situation construction materials <i>L. Topolář, L. Pazdera, K. Timčáková & D. Štefková</i>	291
University BIM distance learning course for secondary school students <i>K. Usanova & N. Vatin</i>	297
The numerical analysis of deteriorated steel elements reinforced with CFRP <i>J. Vůjtěch, P. Ryjáček & M. Vovesný</i>	303
Basic features of aggregate-matrix-interface fracture of concrete: Pilot modelling <i>M. Vyhliďal, H. Šimonová, V. Veselý, Z. Keršner, J. Klusák & L. Malíková</i>	309

Part B: Buildings and structures, Construction technology and management, Environmental engineering, Heating, ventilation and air condition, Materials and technologies, and Water supply and drainage

Diagnostics to determine the cause of occurrence of cracks on ETICS <i>N. Antořová, M. Ďubek & M. Petro</i>	317
Verification of the technology choice repairs ETICS <i>N. Antořová, M. Ďubek & M. Petro</i>	323
Technical measurement of the green roof in a winter season <i>R. Baláž & S. Tóth</i>	329
Assessment of ground water infiltration to the basement garage spaces <i>R. Baláž & S. Tóth</i>	335
Monitoring the effectiveness of sorbent materials for removing selected metals from water <i>R. Biela, T. Kučera & J. Konečný</i>	341
Technology of waterproofing membranes based on mPVC for flat roof <i>M. Božík, M. Ivanko, A. Mečiar & M. Petro</i>	347
Importance of aerodynamic quantification in the determination of heat losses in buildings <i>I. Bullová</i>	353
New methods of optimizing building maintenance <i>Z. Čúciková, M. Hanko, V. Somorová & R. Matúšek</i>	359
The inclusion of a water feature to the interior and its impact on internal microclimate <i>K. Čákyová & Z. Vranayová</i>	365
A human induced landslide in the centre of a town <i>W. Dąbrowki, M. Zielina & J. Bąk</i>	371
Implementing effective Supply Chain Management (SCM) strategies <i>N. Daneshjo, M. Kravec, A.A. Samer & J. Krivosudská</i>	377
Detecting fibers in the cross sections of steel fiber-reinforced concrete <i>M. Ďubek, P. Makýš, M. Petro & P. Briatka</i>	383
Waste water treatment in North Moravia and Silesia, from the past to the present <i>T. Dvorský, V. Václavík & P. Hluštík</i>	389
Model house with modifiable disposition <i>J. Gařparík, J. Piatka, P. Šimko, M. Šmotlák & P. Orosi</i>	395
Optimizing method of building machine group selection implemented into soil processes with software support <i>J. Gařparík, S. Szalayová, Z. Hulínová, L. Paulovičová & V. Laco</i>	401
Spatio-temporal analysis of soil properties for the eastern border of the European Union <i>E. Glowienka, K. Michalowska & A. Pekala</i>	407
Use of the program SWMM to simulate rainfall runoff from urbanized areas <i>P. Hluštík, M. Úterský, V. Václavík & T. Dvorský</i>	413
Causes and impacts of dropping water consumption on a wastewater treatment plant <i>P. Hluštík, V. Václavík & T. Dvorský</i>	419
Effectiveness of costs incurred for labor protection <i>Z. Hulínová, T. Funtík, J. Madová & A. Bisták</i>	425

Fiber optic temperature measurement of mass concrete at an early age – case study <i>N. Humar, D. Zupan & A. Kryžanowski</i>	433
The effect of distance and noise barrier at the dispersion of pollutants in the vicinity of roads <i>D. Jandacka & D. Durcanska</i>	441
The effective use of renewable energy in the design of construction equipment <i>E. Jankovichová, M. Nguyen Tien & S. Hajduchová</i>	447
Properties of autoclaved aerated concretes produced with different types of fibers <i>C. Karakurt & Ö. Korkmaz</i>	453
Selected problems of temperature conditions in the interior of large area of single store halls <i>J. Katunská, D. Katunský & S. Tóth</i>	459
The efficiency of green roofs to mitigate urban heat island effect in Rio de Janeiro <i>S. Konasova</i>	465
Thermal mass of building construction versus operative temperature <i>K. Kovacova & M. Kovac</i>	471
Effect of admixtures on probabilistic indexes of concrete quality with consideration of environmental impact <i>S. Koval, M.J. Ciak & N. Ciak</i>	477
The possible areas to use 3D printers in building constructions <i>B. Kovářová</i>	483
Knowledge database of modern methods of construction <i>M. Kozlovska, D. Mackova & M. Spisakova</i>	489
Impact of construction activities on GDP in the Czech Republic and its regions <i>L. Kozumpliková, J. Korytářová & B. Puchýř</i>	495
Wooden structures: Traditional and yet forgotten <i>I.H. Krčmář</i>	501
Microorganisms growing on insulated façades <i>M. Kubečková, V. Kučeriková & D. Kubečková</i>	507
Changes in housing demands and their influence on overall user comfort for a block of flats in the Czech Republic <i>D. Kuta, J. Ceselsky & M. Zubkova</i>	513
Contactless method of measuring displacement in the study of brick prisms <i>D. Łątka & M. Tekieli</i>	519
Evaluating adhesion of weatherproofing sealant joints: Price vs. quality <i>P. Liška, B. Nečasová & J. Šlanhof</i>	525
Vertical distribution of compact air jets in the hall of an ice arena <i>E.A. Loktionova, D.Y. Malyshevsky, D.I. Schemelinin & D.D. Zaborova</i>	531
Theoretical and methodological principles of impact assessment of strategic documents on environment and health <i>M. Majerník, N. Daneshjo & G. Sančiová</i>	537
Modelling of integrated impact assessments of development strategies <i>M. Majerník, G. Sančiová, N. Daneshjo & J. Krivosudská</i>	543

Fighting moisture in baroque buildings – case study <i>O. Makýš & D. Šrobárová</i>	549
Comparison of wind pressure on high-rise building obtained by numerical analysis and experimental measurements <i>S. Medvecká, O. Ivanková & L. Konečná</i>	555
Semi-automated budgeting of structures included in modern methods of construction based on 3D model <i>P. Mesároš, J. Talian & M. Kozlovská</i>	561
Scheduling of tower cranes on construction sites <i>V. Motyčka & L. Klempa</i>	567
Research summary: Analysis of selected adhesive systems intended for façade bonding <i>B. Nečasová, P. Liška & J. Šlanhof</i>	573
The impact of green roofs on thermal protection and the energy efficiency of buildings <i>D.V. Nemová, A.K. Bogomolova & A.I. Kopylova</i>	579
Thermal insulation systems (ETICS) – important layers of the system and testing the implementation of non-standard temperatures <i>M. Novotný, P. Liška, B. Nečasová & J. Šlanhof</i>	585
The influence of form of public space around residential complexes on quality of living <i>D. Orsáková & A. Bilková</i>	593
Cultural influences conditioning the development of funeral architecture, its current status and its future direction <i>K.F. Palánová & O. Juračka</i>	599
Vegetation of the green roof affecting temperature under the foliage <i>Z. Poárová, F. Vranay & Z. Vranayová</i>	605
Impact of environmental aspect and safety at work in designing of mechanized building processes <i>K. Prokopčáková, Z. Hulinová, S. Szalayová & L. Prokopčák</i>	611
Implementation of risk management theory for the development of lean thinking in a construction company <i>A.E. Radchenko & M.V. Petrochenko</i>	617
Definition of benchmarks for the assessment of the economic performance of buildings <i>D.A. Ribas, M.M. Morais & P.B. Cachim</i>	623
Baseline emission inventory – a methodology for municipalities <i>M. Rohlena & J. Frkova</i>	631
Turning grey into green – integration of living walls in grey water system <i>M. Rysulová, D. Kaposztasová, Z. Vranayová, J. Castellar & J. Morato</i>	637
Evaluation of test methods for testing of sealants <i>J. Šlanhof, P. Liška & B. Nečasová</i>	643
Thermal assessment of chosen foundation details of energy-efficient family houses constructed in Kosice, Slovakia <i>P. Turcsanyi & A. Sedlakova</i>	649
Heat exchange peculiarities in ventilated facades air cavities due to different wind speed <i>N.P. Umnyakova</i>	655

Impact of structural and technological optimisation on quality and durability of concrete car garages <i>V. Vacek, M. Sýkora & V. Vančík</i>	661
Software-based support to decision-making process regarding the selection of concrete suppliers <i>V. Venkrbec & Ú. Klanšek</i>	667
Safety versus cost of linear structures in public procurement <i>J. Vlčková & S. Henková</i>	673
The problem of sufficient/insufficient airflow in roofs of residential buildings <i>J. Vojtus & M. Kovac</i>	679
Traffic calming as a means of improvement of the urban environment <i>M. Záhora, D. Vaněk & M. Peřinková</i>	685
Possibilities of the utilization of natural fibers for insulation materials production <i>J. Zach, J. Hroudova, V. Novak & M. Reif</i>	691
Technical conditions of barrier-free housing and needs of people with physical limitations <i>R. Zdařilová</i>	697
Analysis of rainfall trends in Syria <i>M. Zeleňáková, I. Alkhalaf, P. Purcz, P. Blištan & M.M. Portela</i>	703
Numerical analysis of cylindrical wedge-wire screen operation <i>M.Z. Zielina, A. Pawłowska & A. Kowalska-Polok</i>	709

Part C: Geodesy, surveying and mapping, and Roads, bridges and geotechnics

The effect of light on the work of the electronic levels <i>A. Atroshchenkov, N. Belyaev, E. Kosyakov, E. Mikhalenko & M. Rodionova</i>	717
Cyclic load tests of driven pile base capacity <i>M. Baca, Z. Muszynski, J. Rybak, T. Zyrek & A.G. Tamrazyan</i>	723
The issue of barrier-free public places – the transport interchange Ostrava-Svinov <i>A. Bilková, B. Niemiec, P. Kocurová & D. Orsáková</i>	729
Joint road safety operations <i>P. Danišovič & L. Remek</i>	735
Evaluation of pavement stochastic unevenness of Žilina airport RWY on the base of stationary ergodic process theory <i>M. Decký, E. Remišová & Ma. Kováč</i>	741
Road surface characteristics on experimental road section with crumb rubber additive and connection with road traffic noise <i>O. Frolova & B. Salaiova</i>	747
Assessment of slope stability in interaction with the subsoil <i>S. Harabinová, E. Panulinová, E. Kormaniková & K. Kotrasová</i>	753
Guidelines and recommendations for vibration control in the case of rapid impulse compaction <i>A. Herbut & J. Rybak</i>	761

Determination of tunnel face stabilizing pressure using numerical and analytical methods	767
<i>E. Hrubesova, L. Duris, A. Melichar & M. Jaafar</i>	
Evaluation of scenic route choice factors	773
<i>Ç. Kara, Ş. Bilgiç & K.B. Akalın</i>	
The large roundabout adjustment's assessment of effectiveness	779
<i>V. Krivda, K. Zitnikova, J. Petru & I. Mahdalova</i>	
Laboratory models of a railway track with the subgrade layer based on rubber granulate	785
<i>M. Lidmila, V. Lojda & O. Bret</i>	
Natural asphalt additives for road surface layers	791
<i>J. Mandula & T. Olexa</i>	
Asphalt belt sliding joint – possible extension of use due to electric target heating	797
<i>P. Mateckova, M. Janulikova & D. Litvan</i>	
Interaction of the asphalt layers reinforced by glass-fiber mesh	803
<i>J. Olsova, J. Gašparik, Z. Stefunkova & P. Briatka</i>	
Extinct settlement identification using small format aerial photography – methods and accuracy	809
<i>J. Pacina, J. Popelka & M. Tobisch</i>	
Deformation measurement and using of GPR on the Charles Bridge in Prague	817
<i>K. Pavelka, M. Faltýnová, E. Matoušková & J. Šedina</i>	
Modeling of the impact of a pedestrian crossing on resulting capacity of a roundabout	823
<i>J. Petru, V. Krivda, K. Zitnikova & M. Kludka</i>	
Research of selected factors of safety in road tunnels for practice	829
<i>M. Rázga, E. Jančaříková & P. Danišovič</i>	
Effects of biaxial and thermal loads on rail-slab track interaction behavior	835
<i>V. Stančík & P. Ryjáček</i>	
Using of photogrammetric methods for deformation measurements and shape analysis	841
<i>J. Šedina, K. Pavelka & E. Housarová</i>	
Creation of ground plans in terms of data structure and map bases	847
<i>L. Teslikova Hurdalkova & D. Kuta</i>	
Verification of pavement construction characteristics measured with non-destructive methods	853
<i>K. Zgútová, M. Trojanová, J. Šrámek & M. Blaško</i>	
Author index	859
